

which software do I need preinstalled software

Operating System:

All OEM Microsoft Windows operating systems purchased from us are preinstalled on your device. If you purchase an SSD, we install the Windows operating system onto the SSD by default.

We want to ensure that you can take the advantage of an SSD when you start the operating system.

A System Builder versions will be laid into the package and are not preinstalled.

We do not install any additional software

Unique solution ID: #2780
