

questions about products

what are "Sonderposten"?

"Sonderposten" are exhibits, lease reclaimers returns or systems which were used at large companies. You are going to receive completely tested, revised and cleaned systems where Windows is already pre-installed.

Used PC systems and notebooks are an ideal way to save money - without sacrificing high-quality and reliable devices. Also the environmental aspect is not negligible because by re-usage of equipment valuable resources are saved and the electronic waste is reduced.

The goods are shipped in neutral packaging. We are not able to offer you the original packing. Optical defects can be present. The warranty is 12 months, unless otherwise stated in the description of the product.
